Professional Summary:

Strategic and customer-centric Engagement Manager & Certified Scrum Master with 15+ years of experience delivering impactful solutions across Automotive and Telecom domains. Adept at leading cross-functional teams and managing complex technical programs, with a strong focus on stakeholder engagement, customer success, and outcome-driven delivery. Proven track record of translating AI-powered innovations and cloud-native architectures into tangible business value for global clients including Honda, Renault, Motorola, and Vodafone. Known for building trusted relationships, aligning delivery with strategic goals, and driving excellence through empathy, authenticity, and agile leadership.

Customer Engagement Highlights

- Built long-term partnerships with Honda and Renault through consistent delivery, proactive communication, and strategic alignment.
- Recognized by clients for **empathy-driven leadership**, ensuring their goals were understood, respected, and achieved.
- Led cross-functional teams through ambiguity, focusing on **value creation** and **customer-defined success metrics**.

Professional Experience:

Current Project: Data Management Platform for Honda R&D Division.

Client: Honda Japan **Domain:** Automotive Sensor Data & Research Analytics

Overview: Honda conducted extensive test drives across Japan, the US, and Europe using vehicles equipped with advanced sensors (GPS, AVI, etc.). The collected sensor data was uploaded to regional data centers for centralized storage and analysis. The project's objective was to design and implement a web-based platform to visualize and interpret this data, enabling Honda's R&D teams to derive actionable insights for research and innovation.

KPIT Responsibilities:

- **Data Ingestion & Preprocessing**
 - Automated collection and cleansing of multi-format sensor data from global test drives.
 - Seamless upload to regional data centers (Japan, US, Europe).
- **Data Pipeline & Architecture Design**
 - Defined scalable data pipelines for real-time and batch processing.
 - Architected robust infrastructure for cross-region data flow and integrity.
- **Video Anonymization & Metadata Management**
 - Implemented privacy-preserving techniques for in-vehicle video feeds.
 - Structured metadata tagging for efficient indexing and retrieval.
- **Drive & Event Session Management**
 - Developed logic to segment and categorize driving sessions and events.
 - Enabled contextual analysis across geographies and vehicle types.
- **Dashboard & Visualization**
 - Built interactive dashboards to display statistics, trends, and anomalies.
 - Delivered web-based access via secure URLs for research teams.

Project Lead – KPIT Technologies Automotive AI | Jan 2024 – Present

- Acted as the **primary customer interface** for Honda Japan, building trust through deep domain understanding and transparent communication.
- Led **stakeholder workshops and strategic planning sessions**, aligning technical delivery with Honda's R&D objectives and long-term innovation roadmap.
- Delivered **value-focused outcomes** by integrating Generative AI dashboards that enabled predictive insights and accelerated decision-making.
- Championed **customer success** by proactively identifying pain points and tailoring solutions to meet evolving business needs.

Technical Leader – LG Soft India Automotive & Mobile | Jan 2011 – Dec 2023

- Managed **global client relationships** with Renault and other OEMs, ensuring consistent delivery excellence and stakeholder satisfaction.
- Facilitated **executive-level reporting and governance**, translating technical progress into business impact for leadership teams.
- Prioritized **outcome over process**, streamlining delivery pipelines to focus on measurable results and customer-defined KPIs.

Senior Software Engineer – Mformation Mobile / Telecom | Mar 2008 – Nov 2010

- Spearheaded certification of **Mobile Device Management (MDM) solutions** for top-tier telecom providers including **Vodafone, Telstra, AT&T, and T-Mobile**, ensuring seamless integration and compliance across diverse network environments.
- Oversaw **end-to-end testing, validation, and release cycles** for mobile data platforms, driving product reliability, performance optimization, and timely delivery in fast-paced telecom ecosystems.

Software Engineer – Tech Mahindra Mobile / Telecom | Sep 2005 – Mar 2008

- Conducted comprehensive **testing and validation** of mobile handsets and applications for **Motorola**, ensuring high performance, stability, and user experience across global markets.
- Implemented rigorous **defect management strategies**, streamlining issue tracking and resolution to support timely product releases and quality benchmarks.

Certifications:

- **Certified Scrum Master (CSM)** – Scrum Alliance.
- **ISTQB Certified** – Foundation Level.
- **PMI-ACP** – Agile Certified Practitioner.
- **Agile Scrum Master & Agile Scrum Foundation.**
- **AWS Certified** – Cloud Practitioner, DevOps Engineer, Security Specialty.
- **Coursera** – Introduction to Self-Driving Cars (University of Toronto).

Honors & Awards:

- **STAR Award – LG Soft India Recognized for Project Delivery Excellence**, driving high-impact automotive solutions with precision and agility.
- **Cross-Industry Recognition** Commended by **LG, Motorola, and Tech Mahindra** for outstanding contributions in **innovation, technical leadership, and quality assurance**, consistently exceeding performance benchmarks across global programs.
